

Checklist

Testing the side cart

- ☐ Is the empty side cart opened?
- ☐ Add to the cart a product.
- ☐ + and - buttons work in the side cart. Does a quantity of goods go to the minus?
- ☐ Can you write symbols in a quantity field?
- ☐ When you add products more than available to the cart how does the site react?
- ☐ When you write 0 in a quantity field in the cart, is a product removed?
- ☐ What is the reaction of the site when adding a large number of different products to the cart?
- ☐ How long does a product stay in the side cart?
- ☐ The store has available 10 items. If the first user adds all items to the cart, can other users buy the same products?
- ☐ Is it possible to add 0 product to the cart?
- ☐ When a product is deleted from the side cart does the site ask you to re-verify?
